EXTERNAL AIR KIT

1.1 Warnings

⚠ This instruction is an integral part of the appliance booklet onto which the kit is installed. Refer to that booklet for general warnings and fundamental safety rules.

⚠ Follow the sequences outlined in the various paragraphs for a quick and proper assembly of the components.

1.2 Supply composition

The accessory supply consists of:

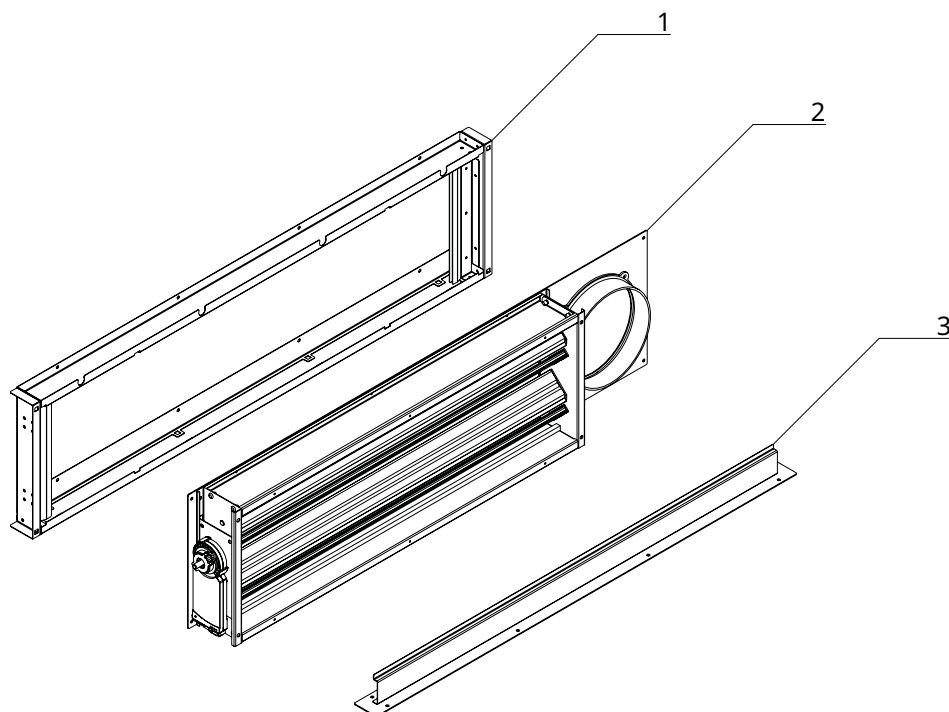

1 Support frame
1 Motorized Recirculation Damper
1 Female Flange DN 160
1 Filter port
Round head screws

Description

The external air kit compatible with fan coil units includes a recirculation damper equipped with an electromechanical actuator that precisely controls the recirculated air flow,

along with an air intake that ensures the supply of external air.

- | | |
|----|--------------------------------------|
| 1. | Support frame |
| 2. | Damper Plate and External Air Intake |
| 3. | Filter port |

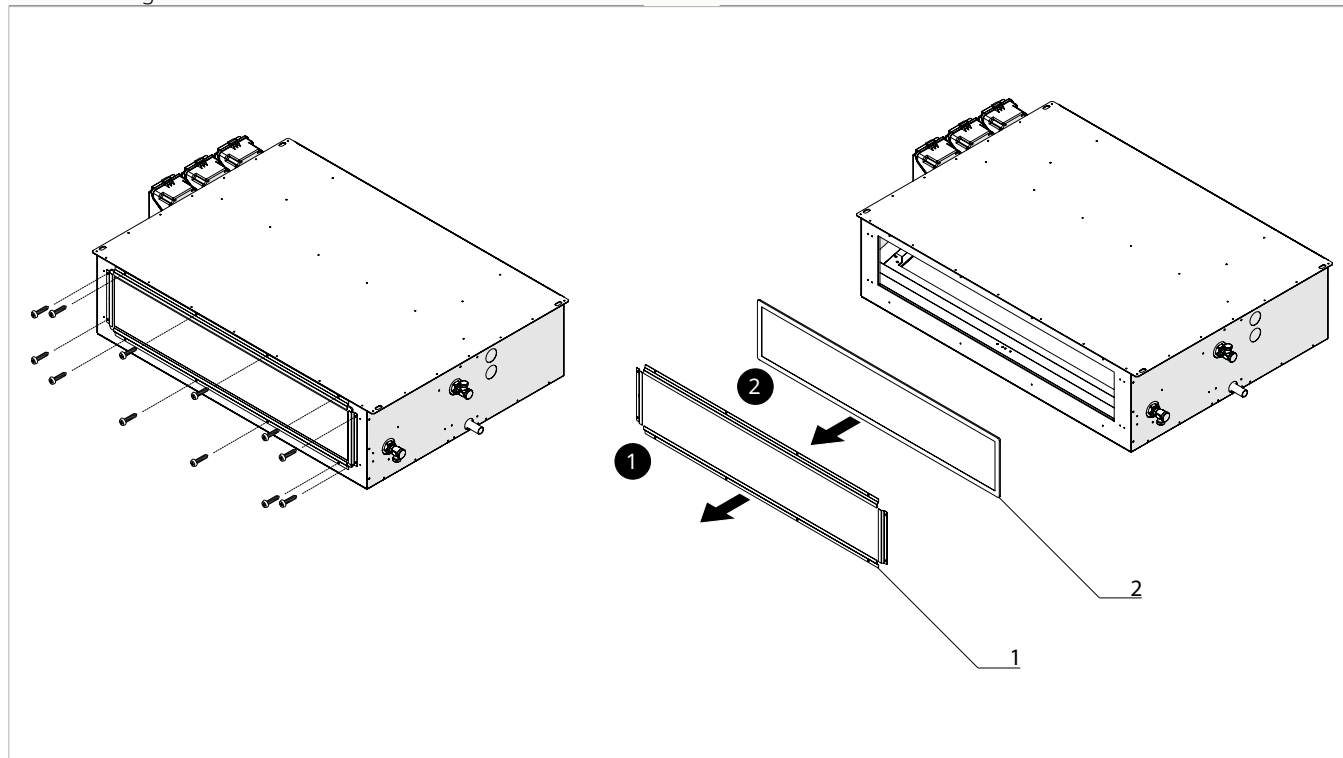

1.3 Mounting

Installation

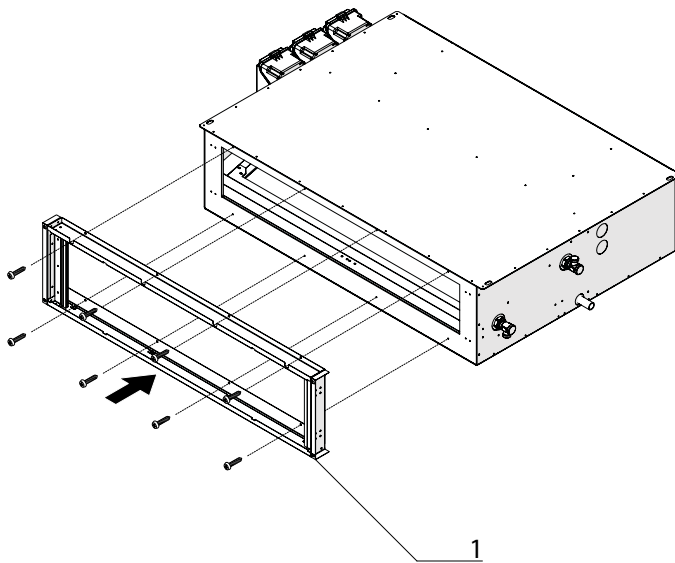

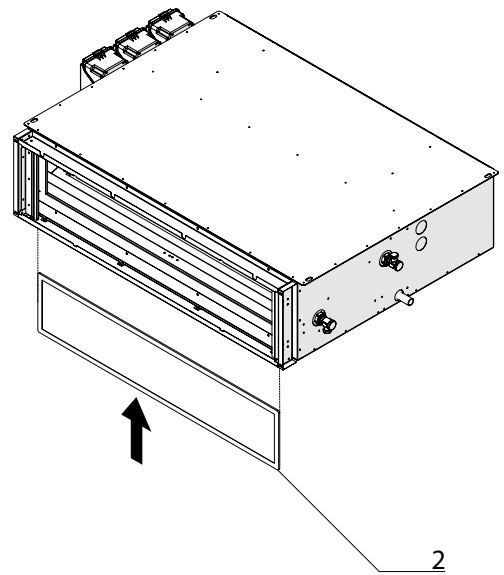

To prepare for the accessory assembly:

- ▶ remove the filter guides from the unit by unscrewing the screws.

- ▶ remove the filter

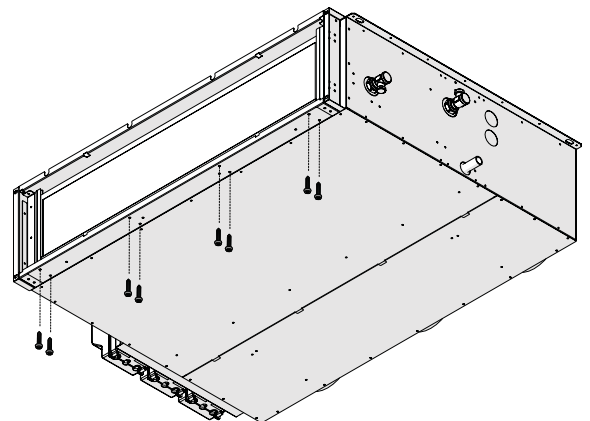

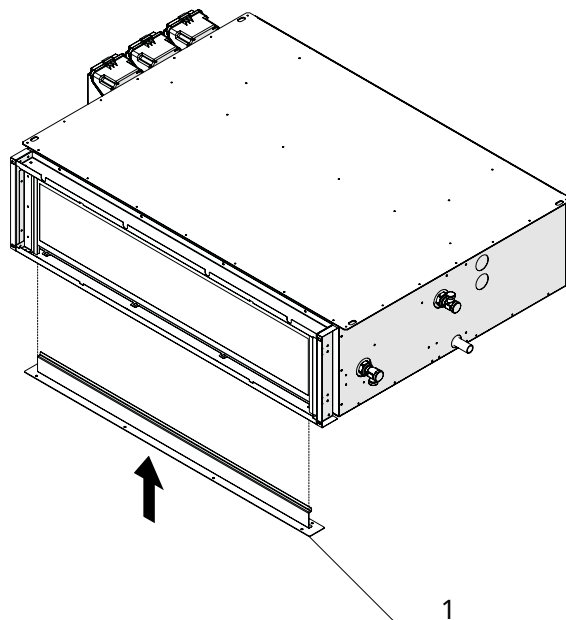

1. Filter guides**2. Filter****To install the support frame:**

- ▶ use the previously removed screws
- ▶ secure the support frame
- ▶ insert the filter into the support frame guides

1. Support frame**2.** Filter**To install the filter port:**

► use the provided screws

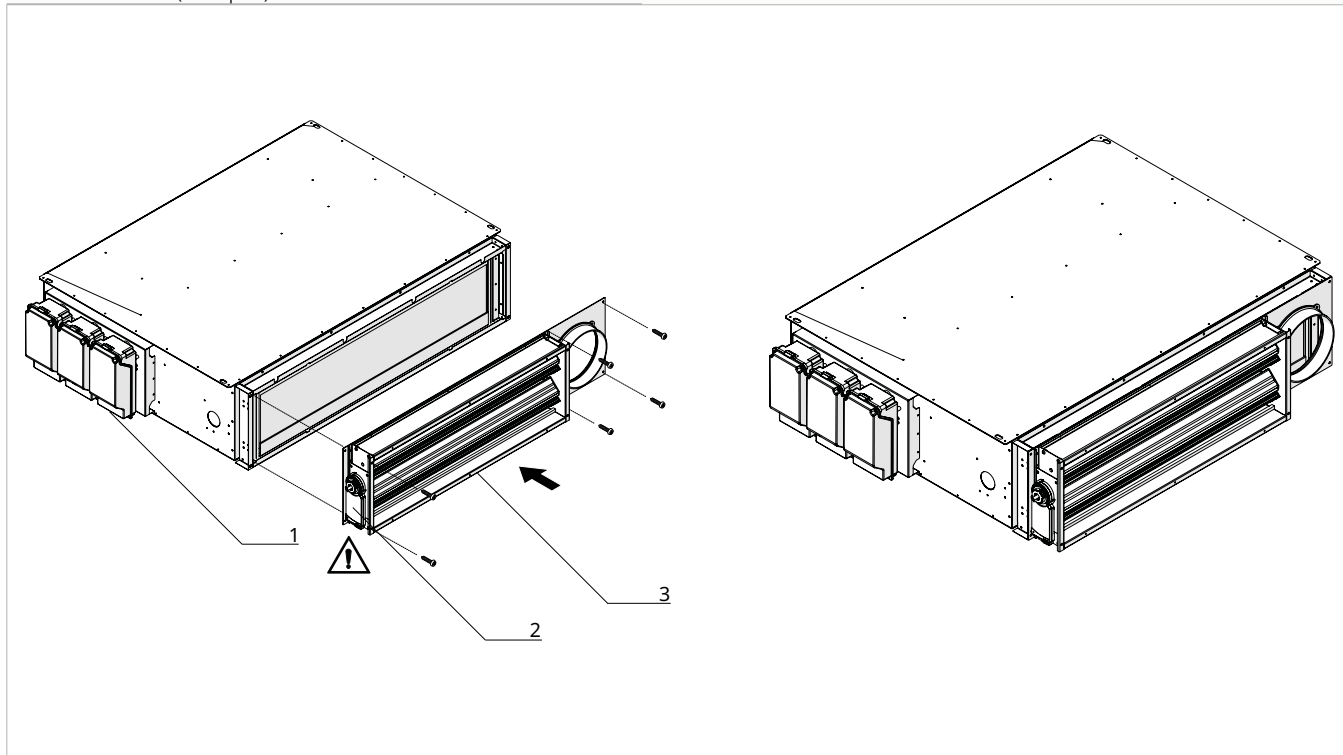

► secure the filter port

1. Filter port**To install the damper plate and external air intake:**

- align the damper plate and external air intake with the actuator on the same side as the electrical panel of the unit
- use the provided screws and the previously removed screws
- secure the plate onto the support frame

1. Electrical panel
2. Actuator (damper)

3. Damper Plate and External Air Intake

⚠ Position the damper plate with the actuator on the same side as the electrical panel of the unit.

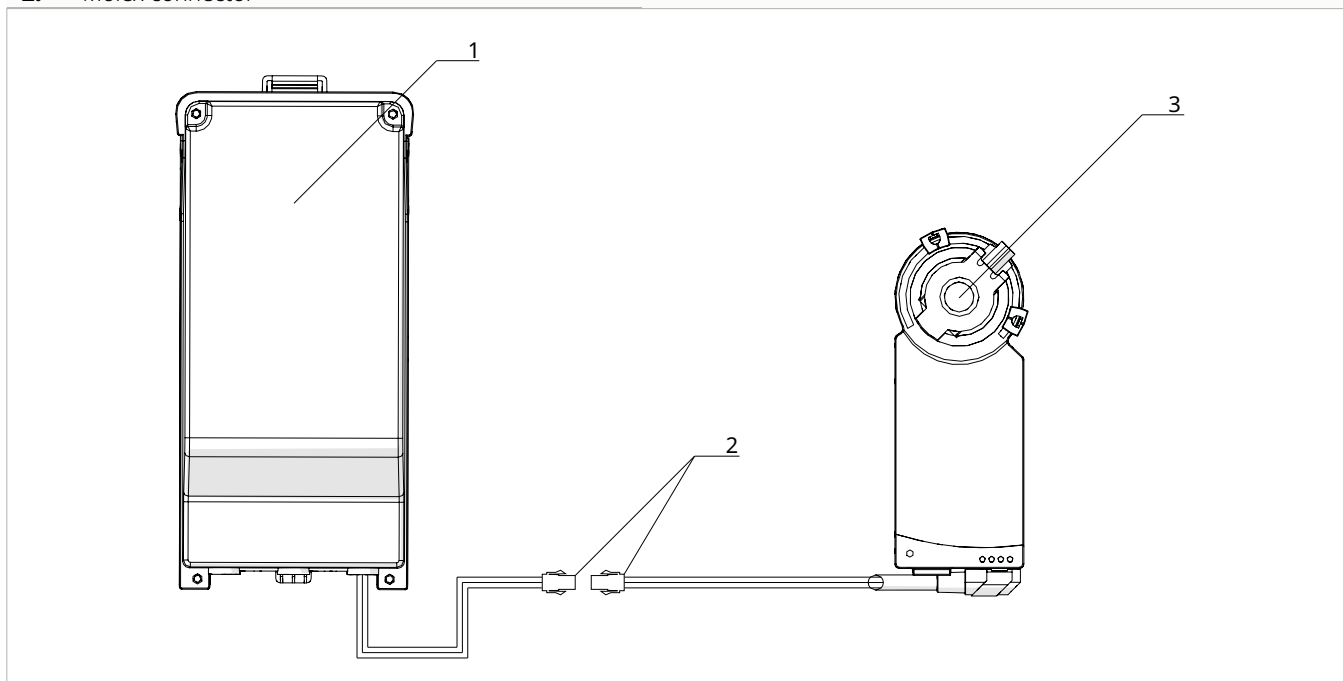

1.4 Electrical connection

If there is a Molex connector on the unit:

► connect it to the connector provided on the external air kit

1. Electrical panel
2. Molex connector

3. Actuator (damper)

If there is a terminal block on the unit:

► remove the connector from the external air kit

► connect the cables to the terminal block

- 1. Electrical panel
- 2. Terminal block

- 3. Actuator (damper)
